

INTERNAL ACCESSORIES

PSS Plain Steel Shelf / MFC Shelf

A plain steel shelf that has been designed with both strength and flexibility in mind, can be fitted into 800, 1000 and 1200 wide units; MFC Shelves can be made for any size unit. We also supply freestanding dividers (sold separately) which clip to the shelves to make distinct sections.

SSS Slotted Steel Shelf

A versatile steel shelf that has multiple slots spaced every 25mm to accept 170mm high steel dividers (these dividers are sold separately). Can be fitted into 800, 1000 and 1200 wide units; this shelf can only fit in a 500 deep unit.

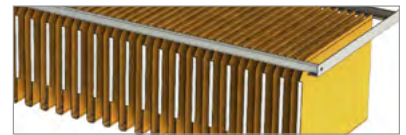

CBS Combination Steel Shelf

A plain steel shelf that has been fitted with an adjustable rail on the underside that allows for lateral suspension filing. Can be fitted into 800, 1000 and 1200 wide units, A4 deep plain steel shelves can suspend files without the adjustable rail.

LFF Lateral Filing Frame

A pair of lateral filing rails mounted in adjustable brackets to allow for suspension filing. Can be fitted into 800, 1000 and 1200 wide units.

ROS Roll Out Reference Shelf

A pull out shelf designed to be a convenient work surface for making notes or placing documents for faster reference, when done it discreetly slides back into the unit. Can be fitted into 800, 1000 and 1200 wide units.

ROF Roll Out Filing Frames

A fully extending suspension filing frame. Designed to suit foolscap files fitted left to right, but can be converted into front to back filing if fitted with filing bars or have drawer inserts fitted for non-filing storage (both sold separately). Can be fitted into 800, 1000 and 1200 wide units.

SDI Shallow Drawer Insert

A shallow drawer insert that drops into a roll out filing frame (sold separately), it is slotted to accept front to back dividers creating compartments for smaller items (also sold separately). Can be fitted into 800, 1000 and 1200 wide units.

BDI Deep Drawer Insert

A heavy duty steel bin that is inserted into a roll out filing frame (sold separately), it offers versatile storage or can be used for suspension filing. Can be fitted into 800, 1000 and 1200 wide units.

LGR Lateral Garment Rail

A chrome rail fixed in position across the cupboard. The rail is supplied together with garment protectors to prevent clothing getting trapped or damaged by the hinges. Can be fitted in a unit of any width (standard hangers won't fit in a unit shallower than 400mm).

SGR Pull Out Garment Rail

A pull out rail designed for narrow cupboards, in units with a width of 1000mm or more 2 rails can be fitted side by side. The rail is supplied with garment protectors to prevent clothing getting trapped or damaged by the hinges (hangers won't fit in a unit narrower than 400mm).

PGH Pigeon Hole Module

A ready made MFC module of pigeon holes that sits on a shelf inside the unit. These modules can be specified to suit any dimension, configuration and number of slots needed for whatever purpose the user has in mind.
